## **gSource**

gSource is committed to putting the finest instruments into the hands of orthopedic surgeons and their teams.

Not all instruments are equal. Adequate for the job is, in reality, inadequate. A better instrument reduces distractions and facilitates operations. A better instrument helps a surgeon perform at his/her best. A better instrument leads to better results. gSource provides better instruments.

### **gSource Instrument Attributes**

gSource manufactures instruments to perform with precise surgical function. Crafted from German surgical stainless steel, and recognized by their finely finished surface, they are also conceived to be affordable. It is this combination of quality and realistic pricing that distinguishes a gSource manufactured instrument.

### **Adaptability/Flexibility**

In addition to providing large production runs, gSource custom crafts prototypes and pre-production trial samples. Fast and efficient, our streamlined operations help simplify and expedite changes during production.

### **Custom Instrumentation**

Custom-crafted designs can be manufactured in a timely and economical manner. For an accurate quotation and delivery schedule, send us a sample, sketch or drawing.

### **Standard Instrumentation**

Most standard instruments are available from stock. For a complete listing, request a copy of the gSource reSource Binder or explore our web site: [www.gSource.us](http://www.gSource.us). For a quotation, fax us a copy of an instrument depiction or name and part number.
