holds 12 9" osteotomes
12"

gSource

gSource is committed to putting the finest instruments into the hands of surgeons and their teams.

Not all instruments are created equal. Adequate for the job is, in reality, inadequate. A better instrument reduces distractions and facilitates operations. A better instrument helps a surgeon perform at his/her best. A better instrument leads to better results. gSource provides better instruments.

gSource Instrument Attributes

Whether crafted from German surgical stainless steel, or machined from U.S. surgical stainless steel, our instruments are recognized by their finely finished surface. They are designed to perform with precise surgical function and are also conceived to be affordable. It is this combination that distinguishes a gSource manufactured instrument.

gSource Verified Quality

Every gSource instrument must pass detailed Quality Assurance tests before it can be sold. Instruments are tested for quality of material, workmanship, function, pattern consistency and critical dimensions.

Custom Instrumentation

Custom designs can be manufactured in a timely and economical manner. For an accurate quotation and delivery schedule, send us a drawing, sketch or sample.

Standard Instrumentation

Most standard instruments are available from stock. For a complete listing, request a copy of our catalog or explore our website at www.gSource.com. For a quotation, e-mail or fax us a copy of an instrument depiction or name and part number.

Guarantee

All standard instruments are guaranteed for life against manufacturing defects of material and workmanship. Any instrument proving to be defective will be replaced or the purchase price refunded.

Trusted Supplier to World Leaders

Many world leaders and innovators in orthopedics and spine have found in gSource a trusted and reliable partner. We provide superior instrumentation in a time-critical fashion and at realistic prices. From prototypes to full-run production, we are committed to being a valuable business partner, always providing a real return on investment.

What our Customers Say about gSource

"You are the first supplier I go to when searching for an instrument due to your excellent leadtimes and pricing."

"Thank you for providing us with quality instrumentation on a tight schedule. We completed four successful surgeries last week with the instruments you produced, which will improve the lives of four people, with many more to follow."

"Customer service professionalism as well as response to questions has always been excellent."

"Very pleased with the quick turnaround."

"gSource has been, and continues to be a solid supplier; with the best interest of their customers driving them. It is a pleasure to do business with gSource."
