ANNOUNCEMENT as of 03/24/2020

Coronavirus COVID-19

gSource is closely monitoring the ongoing Coronavirus (COVID-19) Pandemic. With the situation rapidly changing, our top priority remains the health and safety of our stakeholders. gSource remains open and operational with appropriate measures being taken to protect the health of its employees. We will continue to update and keep you informed of any additional measures. Please refer to [ANNOUNCEMENT – Coronavirus COVID-19](#) for updates.

Effective immediately and until further notice:

- All company-related domestic/international travel is prohibited.
- Anyone who returns or arrives from a location with a CDC level 3 or higher [travel advisory](#) for COVID-19 must self-quarantine.
- Visitors to gSource are prohibited.
- gSource supply chain shows first signs of interruptions. On 03/24/20 three gSource suppliers shut down temporarily. Due to large onsite inventory, these shut downs do not yet impact gSource ability to ship product. You may experience occasional minor shipment as well as service delays.
- Most gSource staff works remotely. gSource currently operates Monday through Friday with 2 shifts of maximum 5 employees each, while maintaining social distancing, face masks and disinfectant measures.
- Follow your local, state and federal guidelines regarding COVID-19 preventative measures.
- Best way to communicate with your gSource counterpart is via the company email address.
- gSource will switch to electronic customer invoice payment as much as possible.
- Executive orders from gSource are being issued to maintain and ensure a safe and healthy work environment, while limiting negative impacts of medical device supply chain as much as possible.

Thank you for your understanding.
