

ORTHOPEDIC AND SPINAL SOURCE FOR SURGICAL INSTRUMENTS

gSource is a trusted and reliable partner to many world leaders in orthopedics and spine. We provide superior instrumentation in a time-critical fashion and at realistic prices. From prototypes to full-run production, we are committed to being a valuable business partner, always providing a real return on investment.

gSource Instrument Attributes

Whether crafted from German surgical stainless steel, or machined from U.S. surgical stainless steel, our instruments are recognized by their finely finished surface. They are designed to perform with precise surgical function and are also conceived to be affordable. It is this combination that distinguishes a gSource manufactured instrument.

Custom Instrumentation

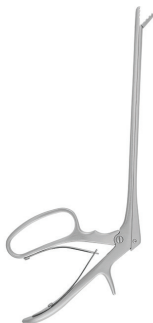

We will create entirely new instruments in a timely and economical manner. For an accurate quotation and delivery schedule, send us a drawing, sample or sketch.

Standard Instrumentation

The gSource catalog contains nearly 3,500 off-the-shelf instruments primarily used in orthopedic and spinal procedures. For a complete listing of instruments available from stock, request a copy of our catalog or explore our website: www.gSource.com. For a quotation, fax or e-mail us a copy of an instrument depiction or name and part number.

gSource Verified Quality

Every gSource instrument must pass detailed Quality Assurance tests before it can be sold. Our instruments are tested for critical dimensions, function, material, workmanship and pattern consistency.

Contact us the next time you require an off-the-shelf or custom instrument.
