

**Instructions for Use  
Wire Guides with Extension**

---

**1. Insert the wire passer around the bone (all shown below).**

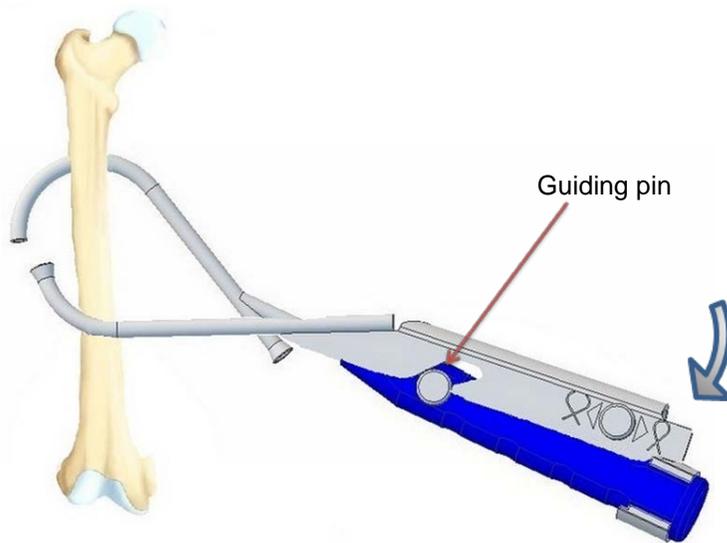

**2. Insert the auxiliary tool.**

**Instructions for Use**  
**Wire Guides with Extension**

---

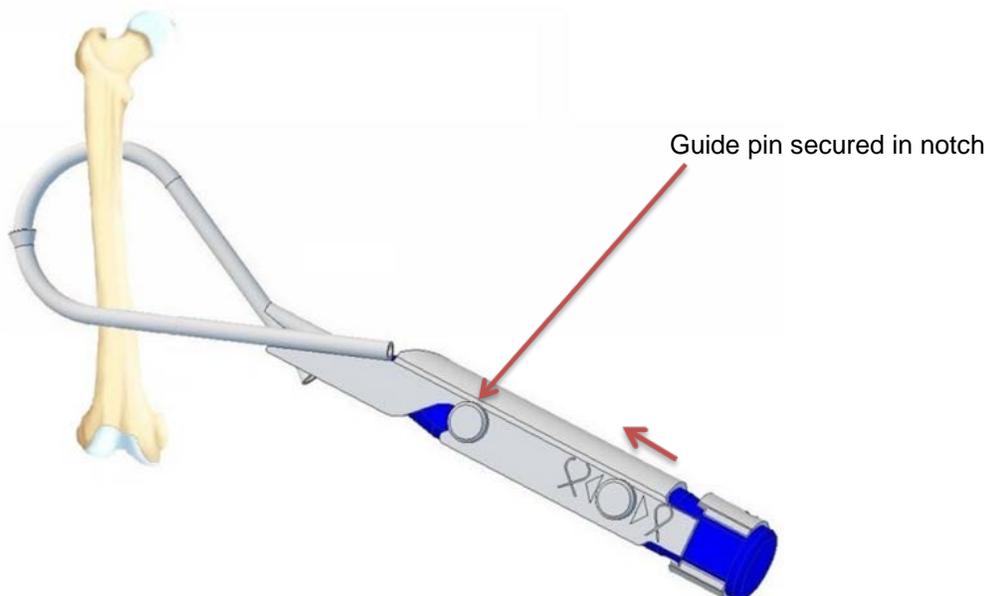

**3. Combine and close both components.**

- Put the notch of the auxiliary tool over the guiding pin and gently slide the components together.
- Align the handle and the auxiliary tool. During the process, the auxiliary tool slides in the notch.

**4. Check the correct position once connected.**

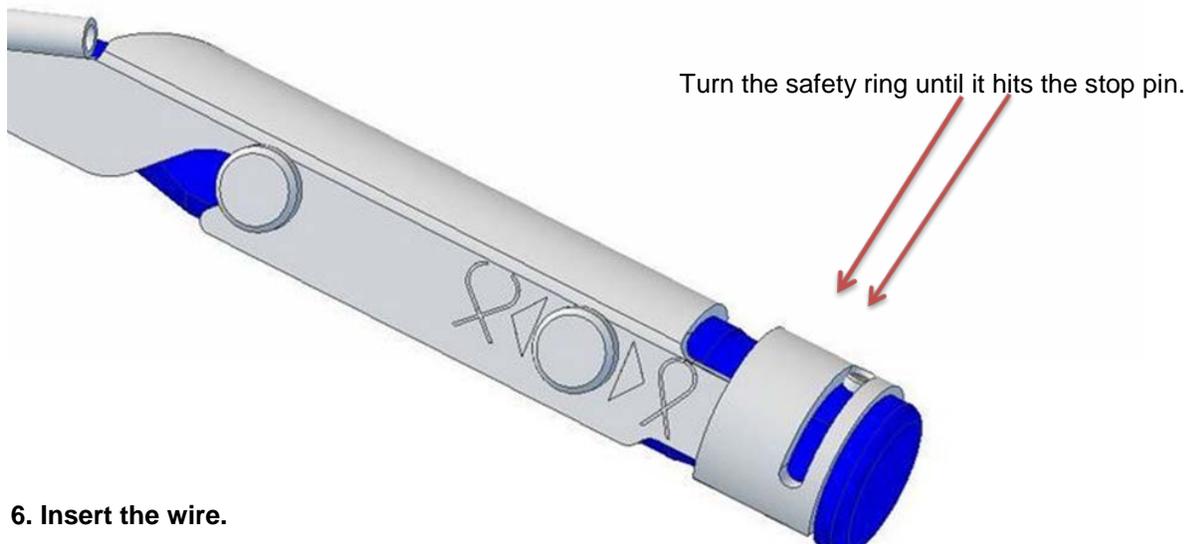

- Align the auxiliary tool until it reaches the end of the notch.

Wire Guides with Extension

---

5. Lock the components by turning the safety ring.

6. Insert the wire.

- Insert the wire in the direction indicated by above black arrows.
- Disassembly occurs in reverse order. Make sure that the wire does not retract during the process.
