

Introducing the all new gEndopunch Modular System!

The gEndopunch Modular Kerrison is the perfect solution for endoscopic surgical procedures. This modular system is available in various shaft dimensions, shaft designs, and working lengths.

- Features excellent cutting performance with a wide cutting range
- Easy to clean integrated flushing channel
- Modular design allows for alternation between various shaft designs
- Our ergonomic handles are made with medical-grade stainless steel and are coated with an easy-grip silicone handle
- The cutting edge can be rotated 360° and can be adjusted in four different positions
- Made from German stainless steel
- Quality verified and guaranteed by gSource
- Open construction allows for optimal cleaning
